

## ACS Metro Ethernet: the unbeatable network solution

ACS has always made sure that the Last Frontier is the first to get the most advanced communications technology available. In fact, we were the very first company in the United States to deploy Metro Ethernet technology, allowing Alaska's businesses to connect multiple locations, within one city, to one seamless network.

ACS Metro Ethernet converges all your voice, video, Internet, and data applications on a single circuit, creating added value, lower cost of ownership and savings for businesses that rely on their communications network. It also provides enhanced reliability, with no single point of failure.

ACS Metro Ethernet also allows businesses more flexibility now and in the future. The service can be tailored to fit the unique needs of multiple business locations, as it allows businesses to assign higher bandwidth where they need it most and save where less is required. And because the cost-per-location declines

as more sites are added, Metro Ethernet provides the lowest-cost, highest-value network solution in the market today.

We already provide Metro Ethernet throughout the state, and are continually upgrading our services and technology to improve customer experience. Just last month, ACS upgraded our Metro Ethernet technology with a new, five-phase build-out across Anchorage. The upgrade provides additional capacity, security and flexibility for the future. In cities all across Alaska, ACS Metro Ethernet is there to provide fast, flexible, reliable, cost-effective network solutions.

Metro Ethernet technology is just one more product that makes ACS the only company in Alaska to provide complete, end-to-end communications solutions to our business customers. To find out more, contact your ACS Business Representative at 907.563.2020 or e-mail [business.leads@acsalaska.com](mailto:business.leads@acsalaska.com).

## More Than Just Talk: the Palm® Treo™ 700WX Smartphone

The Palm® Treo™ 700WX Smartphone combines a compact, full-featured mobile phone with email, messaging, and web-access capabilities. It's also a personal organizer and digital camera—all in one. And its finger-friendly QWERTY keyboard makes it a great choice for typing business emails when you're away from the office.

Other features include Bluetooth® wireless technology for connecting wirelessly to other Bluetooth devices (such as headsets and car kits), an MP3 music player, video-capture through the digital camera, and a vibrant color screen.

And right now, while supplies last, you'll get five free accessories when you buy a Treo desk-top charging cradle with your Treo Smartphone—a \$170.00 value for only \$49.99.
